DEVASHISH SHARMA

Frontend Engineer

+91 86288-38334 devashishsharma039@gmail.com Mohali , Punjab (India)

SUMMARY

Frontend Engineer with 4 years of experience in architecting, designing, and developing scalable web applications. Expert in JavaScript, Typescript, React.js, and Next.js. Adept at optimizing performance and collaborating with cross-functional stakeholders to deliver robust digital solutions. Proficient in leveraging AI-assisted development tools to enhance productivity, code quality, and delivery speed. Passionate about writing clean, maintainable code and applying modern technologies to drive business outcomes.

SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, HTML, CSS, Sass, Tailwind CSS, Ant Design, Redux Toolkit, Redux Saga, Zustand, React Context and Micro-Frontend Architecture (Webpack Module Federation)

Backend & APIs: Node.js, Express.js, RESTful APIs, GraphQL (Apollo Client)

State Management: Redux Toolkit, Redux Saga, Zustand, React Context

Testing: Jest, React Testing Library

DevOps & Cloud: CI/CD Pipelines

Tools & Version Control: Git, GitHub, GitLab

Software Engineering: Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Problem Solving, Debugging

Methodologies: Agile, Scrum

Soft Skills: Communication, Team Collaboration, Adaptability, Analytical Thinking

WORK EXPERIENCE

Antier Solutions | Mohali

Role - Software Engineer | April 2024 - Present | Full Time

- Worked as a Frontend Engineer on large-scale cryptocurrency exchange platforms similar to Binance, delivering secure, high-performance trading experiences across web.
- Built scalable and responsive UIs using React.js, Typescript, Javascript, Sass, Redux Toolkit, and React Context, ensuring consistent performance across devices.
- Optimized frontend performance by reducing page load times, improving state management, and creating reusable custom components, resulting in a smoother user experience.
- Collaborated closely with backend and QA teams to design, implement, and validate complex trading workflows and edge-case scenarios.
- Actively participated in client meetings to gather requirements, clarify business logic, and translate them into robust frontend implementations
- Contributed to code reviews, architecture discussions, Agile ceremonies, and followed best practices across the Software Development Life Cycle (SDLC)
- Utilized Git for version control, Jira for defect tracking, and implemented unit testing to maintain code quality and stability

Technogetic Pvt Ltd | Mohali

Role - React Developer | August 2022 - Feb 2024 | Full Time

- Built scalable e-commerce web applications with React.js and Next.js, focusing on performance optimization and enhanced user experience.

- Implemented secure authentication and authorization flows, ensuring smooth user onboarding and protected access to application features.
- Built fully responsive and mobile-friendly interfaces using modern CSS practices, improving usability across browsers and devices
- Collaborated closely with product team to implement requirements, refine features, and deliver high-quality releases.
- Monitoring and improving front-end performance for better user experience.

PROJECTS

Gems Exchange

- Built scalable and responsive UIs using React.js, Sass, Redux Toolkit, and React Context, ensuring consistent performance across devices.
- Integrated TradingView charts, depth charts, and real-time market data using WebSockets for live updates including order books, trades, and price movements.
- Implemented Google Analytics to track user behavior, trading interactions, and platform engagement.
- Developed Admin portal to manage users, roles, permissions, and platform data, implementing role-based access control (RBAC).

Coinhub

- Optimized frontend performance for large-scale data rendering, adapting and re-optimizing features to support growing user scale.
- Built reusable, scalable components using React.js and Typescript with best practices and clean architecture.
- Integrated TradingView charts, depth charts, and real-time market data using WebSockets for live updates including order books, trades, and price movements.

Holibob

- Developed a large-scale e-commerce and travel booking platform enabling users to book hotels, flights, buses, and tours through a seamless web experience.
- Built scalable frontend modules using Next.js and TypeScript within a Micro-Frontend Architecture, leveraging Webpack Module Federation to enable independent development and deployment of features.
- Implemented efficient data fetching and state management using GraphQL with Apollo Client, optimizing API interactions and reducing redundant network calls.
- Designed and delivered responsive, high-performance user interfaces optimized for cross-browser and multi-device compatibility.

HOBBIES

- Online learning
- Trekking
- Exploring modern web technologies
- Fitness and Strength Training
